Dear Rene,

On August 17, 2007 our offices at Super Stone were set on fire, the damage unbelievable and almost impossible for me to comprehend, having never dealt with anything like this I was at a loss.

From my first contact with you, at a time when I was overwhelmed by it all, your knowledge, experience and advice gave me the peace of mind to turn the building over to you and know that not only would you get the job done, but done as if you was your own property.

Truly never have I dealt with a greater group of people, you and your staff were amazing and I wish I had all their names to thank them individually.

Thank you Rene for everything!

Sincerely,
